

# How to Install NinjaBot

A step-by-step video guide to downloading and installing LupoEngine for  
NinjaTrader 8

---

# Installation Overview

Three fast steps to get LupoEngine installed and ready for trading in  
NinjaTrader 8

# Prerequisites & Requirements

## 1. NinjaTrader 8 Installed

Ensure NinjaTrader 8 Desktop is installed on your Windows PC or VPS and running properly before initiating the import process.

## 2. LupoEngine .zip File

Download the official **.zip archive** file from LupoMarkets. Do *not* un-zip or extract the file after downloading.

# Step 1: Download LupoEngine

## Download Setup Package

Navigate to the official LupoMarkets download page to grab the latest NinjaBot 8 installer package:

<http://lupomarkets.com/ninjabot8-download-setup-installation/>

Save the downloaded **.zip file** to a known location like your Downloads folder.

## Step 2: Access NinjaTrader Import

NAV 01

### Control Center

Open NinjaTrader 8 and focus on the main **Control Center** window toolbar.

NAV 02

### Tools Menu

Click on the **Tools** menu item located in the top menu bar of Control Center.

NAV 03

### Import > Add-On

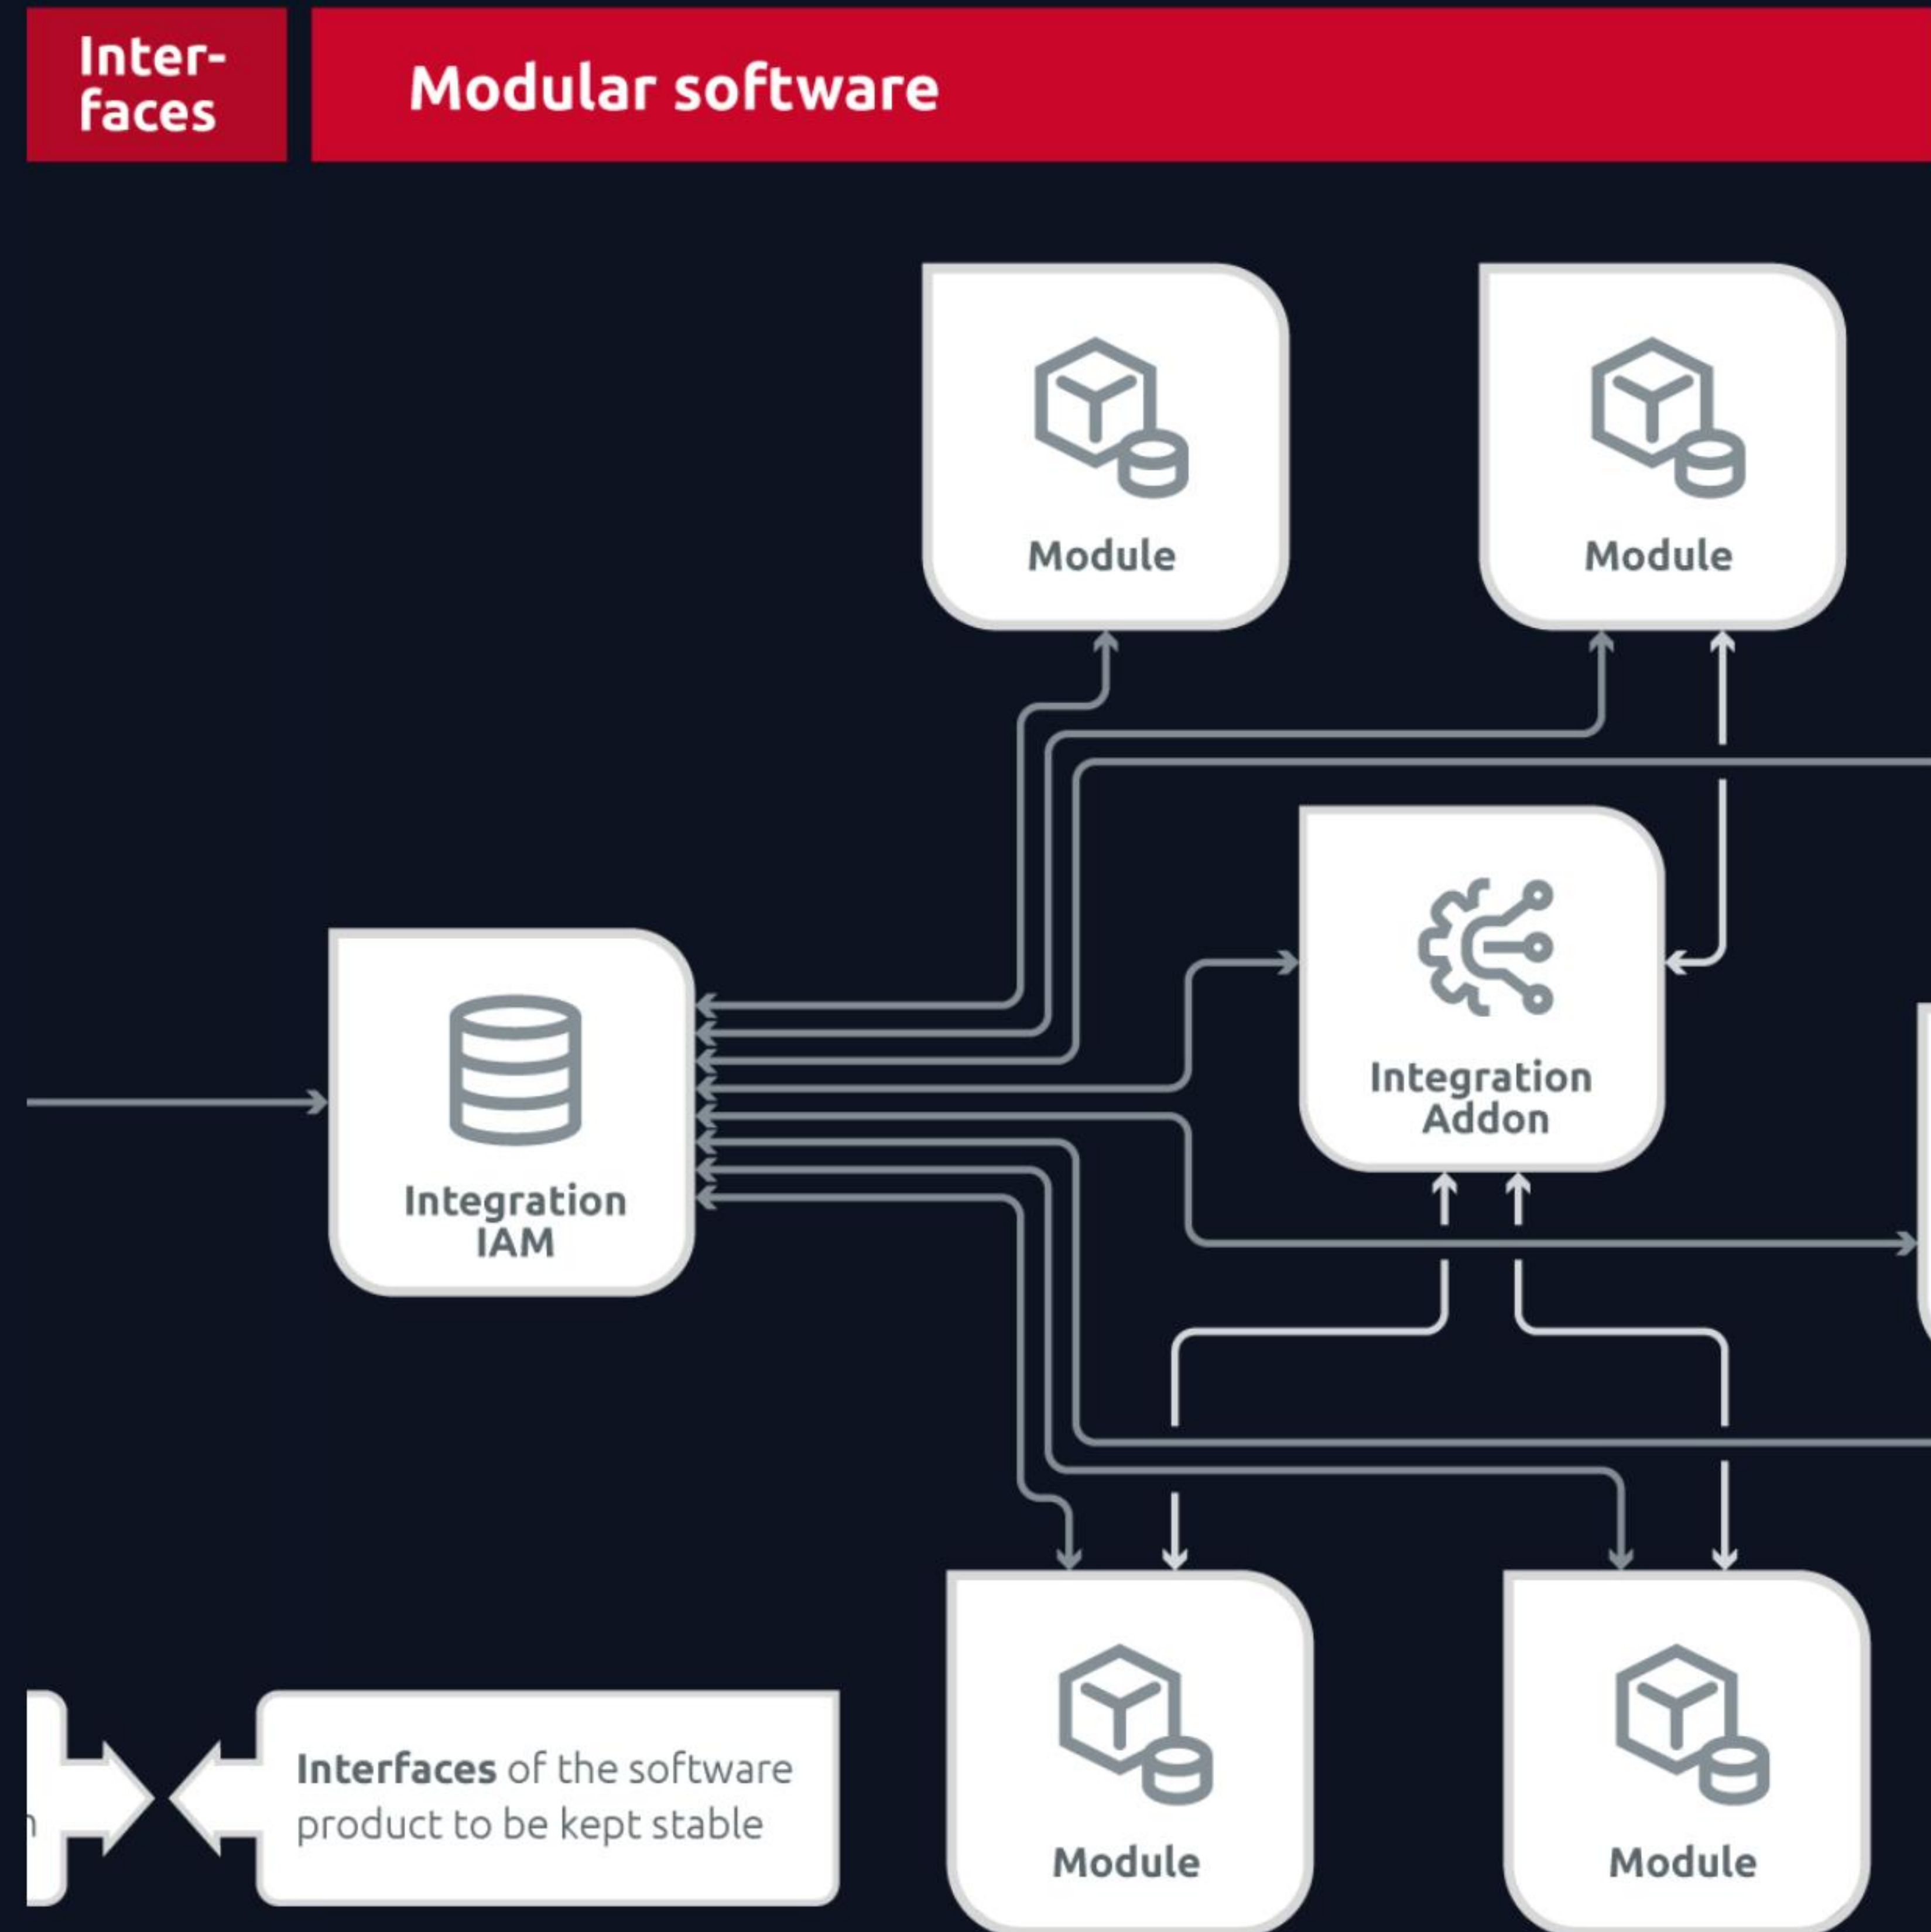

Hover over **Import** and select **NinjaScript Add-On...** from the sub-menu.

# Step 3: Select File

## Select .zip File & Complete

When the file prompt appears, navigate to your download location and select the downloaded **LupoEngine .zip file**.

Click **Open** to start the installation. NinjaTrader will process the package automatically.

# Installation Complete

3

Simple Steps Finished

## Verification & Confirmation

Once imported, NinjaTrader will display a confirmation dialog stating the NinjaScript Add-On was successfully installed.

If prompted to restart NinjaTrader, close and reopen the application to initialize LupoEngine components.

# Post-Installation Checklist

- ✔ **Restart NinjaTrader:** Close and reopen NT8 to ensure all newly imported scripts and DLLs load properly.
- 🛡️ **Enable NinjaScript DLLs:** Go to *Tools > Options > General* and ensure "*Allow unmanaged NinjaScript Assemblies*" is checked if required.
- ✍️ **Test in Sim Account:** Always verify NinjaBot strategy behavior on a *Sim101* paper trading account prior to live deployment.

# Questions?

You're all set! Enjoy trading with NinjaBot & LupoEngine.
